

Kompanion! Mobility at hand!

Wireless and paperless maintenance!

Kompanion! is the new tool that accompanies the worker in his daily life and provides essential data to do his work. A lot has been said about a "Paperless Office", well maintenance workers are there!

Kompanion!, used in conjunction with Interl Maintenance, offers a rich and intuitive interface for easy access to information, but also allows for simplified feedback of data taken on the ground and the rapid creation of new work orders.

No network available? No problem, Kompanion! also works offline*!

- *The ideal tool to complement your maintenance data by taking pictures of your equipment, spare parts and employees. The Interl listings are updated automatically and the software experience is enhanced for all the company's stakeholders;*
- *Access information necessary for the accomplishment of work: the EQUIPMENT, PARTS, ATTACHED FILES, IMAGES etc.;*
- *DOCUMENT your actions! Take PHOTOS needed to support the work carried out and enter the time worked with the simple use of an automated timer;*
- *Geolocation, made possible using the technology of the iPhone, iPod and iPad, makes this application an essential tool for companies that must travel to other exterior locations or move between onsite locations to provide services, whether for its own purposes or for its clients!*

**Contact us for more
information!**

* Kompanion! automatically synchronizes its information as soon as a network is available

** Available in the iPhone section of the App Store.
